

Why choose Lunaplast™ photoluminescent products? Simple: Luna designs and manufactures the very highest quality PL products in the world, and we offer the very best value for your photoluminescent investment.

**Luna is the industry technology leader:**

- We introduced the very first Strontium Aluminate signage material
- We created the first UL924 EXIT sign visible at 75 feet
- We designed the first EPA “Energy Star” EXIT sign

**We sell the broadest PL product range on the market:**

- We have 3 patents pending
- We offer a complete range of products, including:
  - Rigid signage
  - Semi-rigid signage and markings
  - Flexible self adhesive signage
  - Flexible anti-skid films
- Plus, the industry’s largest selection of material substrates, including:
  - Polyester
  - Polyurethane
  - Acrylic
  - Vinyl
  - Aluminum
  - Aluminum Powdercoat
  - Glass
- We can supply 4 levels of luminance (2100, 2500, 5000, 8500)
- There are unlimited custom applications for Lunaplast™

**We have compiled the most prestigious installed base in the world:**

- NASA – International Space Station
- The Pentagon Building
- Yale Locks & Doors (ASSA ABLOY)
- The Old Executive Office Building (Office of the Vice President)
- Massachusetts Institute of Technology (MIT)
- Los Alamos National Laboratory
- The FBI Building, Washington DC
- The International Monetary Fund
- Sikorsky Aircraft Corp
- Amtrak Railway
- Raytheon Corp
- Bombardier Corp
- Boeing Corp
- Singapore Housing Authority

Lunaplast™ products were chosen for the above applications after exhaustive testing of every PL product available world-wide. No other manufacturer offers the combination of quality, innovation and service that you will find with Luna.
